PROFESSIONAL SUMMARY

Flutter and Android developer with approximately 2.5 years of experience building mobile apps and web platforms. Strong in Flutter, Dart, Kotlin, and Java, with hands-on work in automotive diagnostics (DTC reading, ECU flashing), GetX, and Firebase. Owns features end to end in Agile teams across automotive, HRMS, and EdTech.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Kotlin, Java (Android), GetX, Firebase (Realtime Database, Authentication, Firestore), Android and iOS deployment
Architecture & Testing: MVVM, Clean Architecture, OOP, Code Optimization, Debugging, Postman
Web & Backend: React, Node.js, Express.js, JavaScript, HTML5, CSS3, Bootstrap
Databases & APIs: SQL, MongoDB, RESTful APIs, Third-Party API and SDK Integration
Tools & Practices: Git, GitHub, GitLab, VS Code, Android Studio, Agile/Scrum

PROFESSIONAL EXPERIENCE

Flutter Developer | Autopeepal Technologies, Pune, India Feb 2026 – Present

- Designed and developed Flutter mobile applications for automotive diagnostics, implementing hardware communication over WiFi and USB dongles.
- Built UI components and integrated real-time DTC (Diagnostic Trouble Code) reading and flashing workflows, achieving 99% data accuracy across 3 production vehicle diagnostic apps.
- Collaborated with cross-functional teams to map, validate, and test streaming vehicle telemetry data in Agile sprints.

Full Stack Developer | Global Edutech Pvt Ltd, Pune, India May 2024 – Feb 2026

- Built and maintained native Android layouts and responsive web features for an enterprise education platform using Java, React, Firebase, and SQL.
- Owned the full lifecycle (frontend, backend, and production deployment) for two flagship platform modules.
- Contributed to Agile release planning and automated QA validation cycles, reducing post-release bugs by 20% and speeding up delivery.

KEY PROJECTS

ECU Diagnostic Terminal Tool (Kirloskar and Autopeepal)
Tech Stack: Flutter, Dart, Dongle Communication, ECU Protocols, WiFi, USB

- Built an enterprise terminal app to send and verify low-level ECU instructions through diagnostic hardware over multiple connection types.
- Implemented structural diagnostic checks and core DTC read/write features.
- Developed ECU flashing routines over WiFi and USB dongle adapters.

ErpHrms: Enterprise HR Management System
Tech Stack: Flutter, Dart, GetX, Firebase Realtime Database, Firebase Auth

- Developed a scalable cross-platform HR app with modules for employee onboarding, geo-fenced attendance, automated leave workflows, and performance reviews.
- Structured Firebase data for real-time sync with offline support.

AI Language Learning Platform
Tech Stack: React, JavaScript, SQL, Third-Party AI APIs

- Designed a responsive ed-tech dashboard delivering adaptive coursework, evaluation metrics, and interactive quizzes for K-12 learners.

Smart Attendance Tracker: Native Android App
Tech Stack: Kotlin, Android Studio, MVVM, Jetpack (ViewModel, LiveData, Room), Retrofit, Firebase Auth

- Built a native Android app in Kotlin for employee check-in/check-out with location-based attendance and leave requests.
- Applied MVVM architecture with Room for offline storage and Retrofit for REST API integration.
- Added secure login with Firebase Authentication and a clean, easy-to-use Material Design interface.

EDUCATION

Bachelor of Engineering, Computer Engineering | Pune University 2023 | CGPA: 9.05/10
Diploma in Computer Engineering | MSBTE 2020 | 82.17%

ACHIEVEMENTS

- Awarded 1st Prize in Academics for outstanding performance throughout the engineering curriculum.
- Elected Training and Placement Officer (TPO) Cell Coordinator; co-organized the "Junior Paras" flagship campus event.
